

Bag in Box System – BCIBC – IBC 500

Description

Due to its thought-out construction, the Intermediate Bulk Container (IBC) is a reusable transport system for liquids which saves money within the goods cycle.

Advantages in comparison to traditional one-way transport tanks:

- ? Costs per transport are reduced considerably
- ? Reusable container (only liner bag is disposable)
- ? Hygiene – no decaying, no corrosion, easy cleaning
- ? Safety – product is protected; in combination with the RFID transponder the IBC can be traced
- ? Easy filling, emptying and transport
- ? Optimal space utilization – stackable and collapsible

The new BCIBC has a considerable cost advantage in comparison to conventional systems due to the collapsible construction and the changeable liner bags.

The new BCIBC offers maximum safety and hygiene through changeable liner bags – on request also available in antiseptic form.

Product code / Ref:	BCIBC – IBC 500
External Size:	(L) 1200 mm (W) 800 mm (H) 910 mm
Internal Size:	(L) 1110 mm (W) 710 mm (H) 690 mm
Consists of:	1 IBC 1 Clip-on lid
Weight:	67 kg
Material:	1 A new material
Colour/:	Grey
Volume:	500 Litres
Height collapsed:	430 mm
Useful height:	690 mm
Loading capacity:	650 kg

Statistic stackable: 1 5

Dynamic stackable: 2

Seal BCPB

Capacity: ca. 20 N

Material: PP

Colour: Black
