

BCRB2000 – Road Barrier

Description

Lightweight but very stable and durable, easily transportable and stackable, easy to install, UV resistant, 100% recyclable, removable and portable, Plastic Barriers from Beecraft are manufactured from Polypropylene, with a maximum 6.5 and 9.2 kg weight. Thanks to 360° swivel feet, they adapt perfectly to irregular floors, uneven grounds. Their strong and perfectly stable design, making them ideal for use as pedestrian barriers / crowd control barriers or as queue management for public events, airports and shopping malls.
